TEC, Inc.
169 Ocean Boulevard
Hampton, New Hampshire 03842

Dear Recruiting Manager:

I am writing in response to the Highway/Structural/Traffic/Site Internship opportunity about which I was informed this past week at the Career & Internship Fair at the University of New Hampshire. My coursework and experiences qualify me to work in a professional engineering environment and I am eager to train and further develop my career at your office in Hampton, New Hampshire.

I am currently pursuing a Bachelor of Science in Civil Engineering with a Minor in Architecture Studies at the University of New Hampshire and hold a 3.50 GPA. My courses are challenging and project-driven and have unquestionably rewarded me with invaluable interpersonal and technical abilities. Project Planning & Design, for example, has provided me with experience in effectively interacting with town officials and industry professionals to prepare a feasibility study report for a land development project that benefits the local community. Additionally, Reinforced Concrete Design and Public Health Engineering have helped me to gain proficiency in utilizing software, including VisualAnalysis and AutoCAD, and industry specifications to design and analyze structures.

Apart from the classroom, my work opportunities have rewarded me with real-world experience as a civil engineer, particularly in the field of Materials Engineering. As a Laboratory Intern, I assist University faculty and graduate students in their research for the United States Army Corps of Engineers and Federal Aviation Association involving the design and performance of asphalt pavements. Likewise, as a member of a team participating in the CRH Americas Materials Asphalt Mixture Design Competition, I work closely with my peers to innovate a high-performing balanced asphalt mixture. Beyond providing me with technical expertise, these opportunities have taught me the value of responsibility, collaboration, and hard work in the pursuit of efficacy.

In reviewing the TEC, Inc. CORE values of Continuous Improvement, Ownership Mentality, Respect for People, and Enthusiasm, I am certain that my coursework, work experiences, and passion make me an ideal candidate for the position of Highway/Structural/ Traffic/Site intern. I would be grateful to keep this conversation ongoing with you at an interview. I am also available by telephone at (603) 123-4567 or by email at L.Ricci@gmail.com . Thank you in advance for your consideration. I truly look forward to hearing back from you.

Sincerely,

Luca Ricci
